

ADITYA SHRIVAS

FULL STACK DEVELOPER

+917558299063 | Radha Nagar, Khadakpada, Kalyan - 421301 | adityashrivass95@gmail.com
github.com/Aditya-2003 | [linkedin.com/in/aditya-shrivass-29b111256](https://www.linkedin.com/in/aditya-shrivass-29b111256)

PROFILE SUMMARY

Full Stack Developer specializing in building production-ready web applications with React.js, Node.js, and MongoDB. Developed an AI-powered interview simulation platform with dynamic evaluation, scoring, and performance analytics. Experienced in designing REST APIs, authentication systems, and deploying scalable applications on AWS using Nginx and PM2.

TECHNICAL SKILLS

- Languages :** JavaScript (ES6+), TypeScript, C++, Python
- Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- Backend :** Node.js, Express.js, REST APIs, JWT Authentication, OAuth2.0, MVC Architecture
- Database:** MongoDB (Mongoose), MySQL, PostgreSQL
- AI Integration:** API-based AI Integration, Prompt Design, Response Evaluation Logic
- DevOps & Tools :** AWS EC2, Nginx, PM2, Docker, CI/CD, Git, GitHub, Postman, Linux

PROJECTS

AI-Powered Interview Simulation Platform

React, Node.js, Express, MongoDB

- Engineered a full-stack AI interview platform enabling dynamic question flow and real-time user interaction using React.js and Node.js
- Built an AI-based answer evaluation system generating structured feedback, scores (0–10), and performance insights for each response
- Developed an interview reporting module with overall score, strengths, weaknesses, and per-question analysis to simulate real interview feedback
- Designed and deployed scalable REST APIs with JWT authentication, and hosted the application on AWS EC2 using Nginx and PM2 for production readiness

Nomad's Nook

Node.js, Express, MongoDB

- Built a full-stack room rental platform with intelligent search, dynamic listing creation, and end-to-end booking flow for renters and property owners.
- Implemented role-based access control and session-based authentication, allowing secure onboarding of over 50+ test users with separate privileges.
- Integrated interactive geolocation maps with real-time property filters, enhancing user experience through MapTiler and Leaflet.js integration.
- Streamlined listing and booking management, supporting real-time updates to property details, availability, rent, and status confirmation with UI feedback.

Tremor-Ball

React, Vite, Tailwind CSS

- Built a real-time earthquake visualization app (Tremor-Ball) using USGS live data, tracking 200+ seismic events daily with a responsive User Interface (UI).

EDUCATION

Dr. Babasaheb Ambedkar Technical University
Bachelor in Technology in Computer Science and Engineering

K. Narkhede Junior College, Bhusawal, Maharashtra
Higher Secondary Education

7.81 CGPA
2021 - 2025

85.83 %
2021

RESEARCH PAPER

Vaan-E-Patra: Voice-Based Virtual Assistant for Gmail” — Published in IJARESM (2025)

Led a 4-member team to develop a voice-controlled Gmail assistant using Node.js, NLP, and Web Speech APIs for hands-free email operations (compose, read, send).

CERTIFICATIONS

1] Deloitte Technology Consulting Virtual Internship - Certificate of Completion

Completed real-world tasks in software development, data modeling, and consulting workflows

2] Wells Fargo Software Engineering Virtual Experience — Certificate of Completion

Built and mapped Java data models using JPA and Spring, reflecting backend development processes
